KEY FEATURES

Voice AI

Natural conversations for better care.

- ✓ Accurate speech recognition
- ✓ Understands healthcare context
- ✓ Human-like voice response

Agentic AI

Beyond conversation. Into action.

- ✓ Understand patient intent
- ✓ Retrieve information from hospital systems
- ✓ Execute tasks automatically

Omni-Channel

One agent. Every channel. One experience.

- ✓ 20+ communication channels
- ✓ Unified inbox
- ✓ Consistent patient data across channels
- ✓ Real-time insights

USE CASES IN HOSPITALS

Smart Registration

Automate patient registration and data collection with identity verification.

Appointment & Reminder

Help patients book, manage, and receive reminders automatically.

One Agent. Every Channel.

Switch channels without repeating information. Context stays connected.

Patient Engagement

Deliver follow-up, education, and support to improve compliance and outcomes.
