Empowering Decisions With Your Own Data

Powered by IndiAI

About IndiAI

What is IndiAI?

IndiAI Custom is a Large Language Model (LLM) that has been fine-tuning (retraining) using the company's exclusive dataset. A highly specific, accurate, and secure AI solution that acts as an expert assistant focused solely on your company's knowledge ecosystem.

Key Features

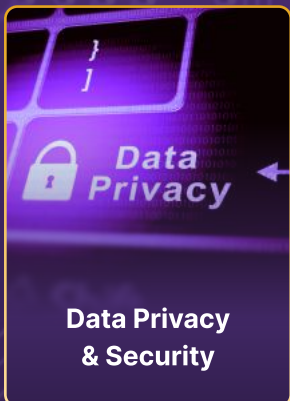

Features for Smarter Operations

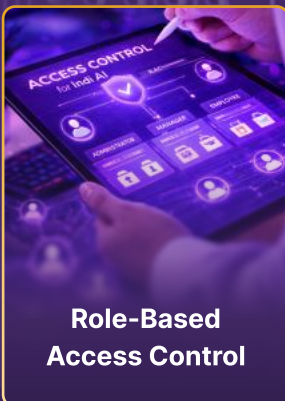

Private Knowledge Integration

Data Knowledge Management

Data Privacy & Security

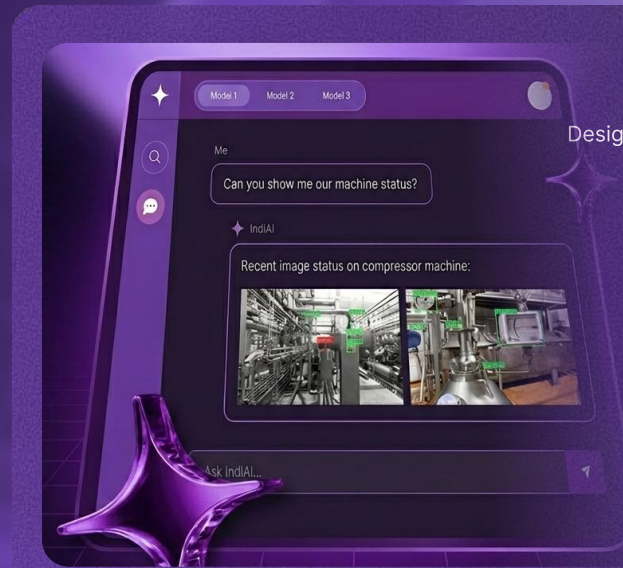

Role-Based Access Control

Product Benefits

Delivering Measurable Value

Personal AI Assistant

Designed to help manage tasks, solve problems, and optimize workflow

IP Ownership

The AI model itself becomes a valuable asset for IndiAI, the company owns the technology.

Operational Efficiency

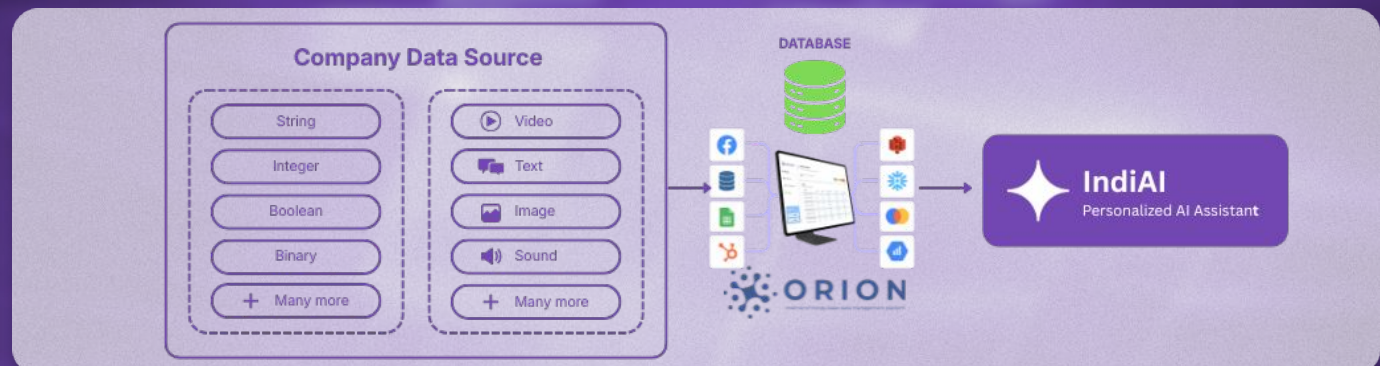

Employees get instant answers and page references with IndiAI.

Data Security & Privacy

There is no risk of sensitive company data leak to public AI providers for model training.

IndiAI Architecture

Modular AI Framework

ORION functions as a data integration platform that collects, cleans, and connects all company data sources to be efficiently channeled into the **IndiAI LLM** model.
