

PT MULTI SINAR ADAMAR **COMPANY** **PROFILE**

ABOUT US

Celebrating 10 years of service in 2025, PT Multi Sinar Adamar is a healthcare solutions company that delivers mission-critical hospital technology through disciplined execution and dependable long-term support. Over the past decade, we have evolved from a fast-growing entrant into a trusted partner, helping healthcare providers plan, implement, and sustain systems that strengthen daily operations.

Our work is guided by a clear code of conduct: credibility, intimacy, sincerity, and reliability. These values shape how we operate by listening closely, setting clear commitments, executing with accountability, and standing behind every installation with responsive service. Through integrated solutions spanning hospital infrastructure and automation, we focus on outcomes that matter: smoother workflows, reduced manual handling, fewer process errors, and higher operational efficiency.

At Adamar, we believe technology creates value only when it is adopted effectively and supported consistently. That is why we combine best-in-class solutions with structured project management, comprehensive user training, and lifecycle service, helping healthcare teams focus their time and expertise where it matters most.

VISION

To be a world class corporation and the best partner in business

MISSION

Running the corporation's core business in healthcare solution based on the value of trust
